

Aerospace Engineers

Aerospace Engineers is a space company which allow customers build physically simulated drones out of hundreds of different parts and explore the huge universe.

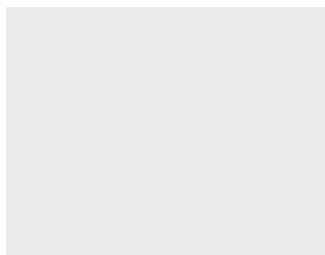

Long Pitch:

The vision behind Aerospace Engineers - is developed from East Lansing, Michigan. Our focus are generated entertainment expolre the universe. People can experiment with a simulator firstly which hold educationsl value as well. our goal is to build a tool that let's customers come up with all kinds of crazy designs, big or small, quick or robust, automated or self-controlled. After creating with a presumably perfect design, they can test their creations in various kinds of missions and compare their result with outhers.
